PROFESSIONAL SUMMARY

Back-End Developer certified by Simplon Senegal (Web, Mobile and AI Developer), specialized in Python and Django. I design secure, documented REST APIs, model relational databases and deploy containerized applications with Docker all the way to production. I also integrate AI models into FastAPI microservices (LLMs, RAG, computer vision). Back-end lead on a civic-tech project for a Dakar city hall and founder of Sen Suivi la Solution, the company behind the Sen Suivi platform, whose server architecture I am building. My background in mathematics and industrial computing gives me a rigorous, structured approach to problem-solving.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript (Node.js), C, SQL
- **Back-End Frameworks:** Django 5 (MVT, ORM, class-based views, signals, admin), Django REST Framework, FastAPI, Node.js
- **APIs & Architecture:** REST API design, serialization, authentication, endpoint and error handling, API documentation, microservice architecture, UML modeling
- **Databases:** PostgreSQL, MySQL, SQLite, Supabase, relational modeling, migrations, relations and foreign keys
- **DevOps & Deployment:** Docker (containerization), Nginx, production deployment on LWS hosting, Git, GitHub, Git Flow, Vercel, Netlify, uv (Python dependency management)
- **Artificial Intelligence:** LLM integration, RAG, intent classification, Hugging Face, computer vision (ResNet-50, ViT), OpenAI, OpenRouter, GroqCloud, n8n automation
- **Quality & Methods:** testing and debugging, QA testing, Agile (Scrum, Kanban), Jira, Trello, Notion, technical documentation
- **Systems & Networks:** Linux (Ubuntu), network administration (basics), industrial computing

PROFESSIONAL EXPERIENCE

Founder & Full-Stack Developer | Sen Suivi la Solution, Dakar
November 2023 – Present

- Design the back-end architecture of Sen Suivi, a web and mobile mental well-being platform for Senegal, using Django and PostgreSQL.
- Model the system in UML around three actors (user, professional, administrator) and develop the REST APIs consumed by the Angular front-end.
- Develop a separate FastAPI microservice for the AI assistant Titou, based on intent classification and a RAG architecture.
- Implement rule- and threshold-based mood tracking, and automate reminders and notifications with n8n.
- Containerize the services with Docker and manage the project in Kanban with Git and GitHub.
- Lead the project as Product Owner.

Project Assistant | Electromechanical Engineering and Maintenance Company, Dakar
April 2023 – September 2023

- Monitored schedules and budgets, and wrote work progress reports.
- Prepared technical documents for client meetings and organized preventive and corrective maintenance.

BACK-END PROJECTS (SIMPLON SENEGAL)

Andë Sétal – Urban sanitation management platform (Dakar Plateau City Hall) | *Back-End Lead*

- Led the back-end development of a civic-tech incident reporting platform, delivered in 8 days by a multidisciplinary team.
- Initialized and structured the repository with Django 5, Django REST Framework and uv, on a MySQL database.
- Designed the REST APIs consumed by an Angular PWA and by an AI module (FastAPI, Hugging Face, RAG).
- Organized the repositories with Git Flow (main, develop, feature, fix) within an architecture deployed with Docker, Nginx and GitHub Actions.

YEES NAA CONNECT – Short-supply-chain marketplace for the local rice sector | *Back-End / Full-Stack Developer*

- Designed the Django architecture (5 apps) and the data models of a marketplace for a team of 4.
- Implemented end-to-end product traceability via QR codes through a relation between products and their source stock.
- Containerized the application with Docker and deployed it to production on LWS hosting.

Eco-Stock – Catalog and inventory management API | *Back-End Developer*

- Designed and developed a complete REST API with Django for managing catalogs, products and inventory.
- Documented all endpoints to ease integration by the front-end team.

Interactive quiz application | *Back-End Developer*

- Developed a Django REST API handling questions, progressive difficulty levels, an overall score and mistake review.

Sunu Idées – AI-powered idea management application | *Full-Stack Developer*

- Connected a Supabase database and set up a server-side proxy on Vercel to call the OpenRouter API and categorize ideas with AI.

EDUCATION AND CERTIFICATIONS

Professional Certification – Web, Mobile & AI Developer (DWWM + AI) | Simplon Senegal – African Tech Bridge, Dakar | *2026*

FORCE-N Program – Digital Entrepreneurship | Cheikh Hamidou Kane Digital University & Mastercard Foundation | *2023 – 2026*

Certificates earned through the program:

- Certificate in Artificial Intelligence (2026)
- Certificate in Front-End Development (2024)
- Certificate in Digital Marketing (2023)
- Certificate in Computing and Internet (2023)

Cybersecurity Certificate – Women in Cybersecurity Education (WiCE) | Cyber221 | *2024*

BTS (Higher National Diploma) in Industrial Computing and Networks | Senegal-Japan Vocational and Technical Training Centre, Dakar | *October 2023 – July 2025*

Bachelor's Degree, Year 2 – Mathematics, Physics and Computer Science | Alioune Diop University of Bambey | *2021 – 2022*

Bachelor's Degree, Year 1 – Mathematics, Physics, Chemistry and Computer Science | Alioune Diop University of Bambey | *2019 – 2021*

Baccalaureate, Series S2 (Experimental Sciences) | Groupe Scolaire Educazur | *2018*

LANGUAGES

French: fluent (C2) | **Wolof:** native (C2) | **English:** intermediate (B1)
