PROFESSIONAL SUMMARY

Front-End Developer certified by Simplon Senegal (Web, Mobile and AI Developer), specialized in Angular and interface integration. I turn Figma mockups into responsive, accessible and high-performing web and mobile applications connected to REST APIs. Trained in design (Figma, Photoshop, Illustrator), I bridge the gap between user experience and code. Founder of Sen Suivi la Solution, the company behind Sen Suivi, a mental well-being monitoring and prevention platform for Senegal whose interface and user journey I design. Used to working in Agile teams with Git, I am looking for a position where I can build useful, polished interfaces.

TECHNICAL SKILLS

- **Front-End Frameworks & Languages:** Angular (standalone components, services, routing, reactive forms), JavaScript (ES6+), HTML5, CSS3, TailwindCSS, Vite.js
- **Integration & Interfaces:** mobile-first responsive integration, PWA, design systems, Figma mockup integration, data visualization with Chart.js, accessibility
- **UI/UX Design:** Figma (mockups, wireframes, prototypes), UX Pilot, user journeys, Photoshop, Illustrator, Premiere Pro
- **API Consumption & Data:** REST APIs, state management, asynchronous calls, Supabase, basic knowledge of Django, PostgreSQL and MySQL on the server side
- **AI for the Front-End:** integration of chatbots and AI assistants, OpenAI and OpenRouter APIs, generative AI
- **Tools & Deployment:** Git, GitHub, Git Flow, Vercel, Netlify, Docker, VS Code
- **Methods:** Agile (Scrum, Kanban), Trello, Jira, Notion, testing and debugging, technical documentation

PROFESSIONAL EXPERIENCE

Founder & Full-Stack Developer | Sen Suivi la Solution, Dakar
November 2023 – Present

- Design the interface and user journey of Sen Suivi, a mental well-being monitoring and prevention PWA for Senegal, from Figma mockup to code.
- Develop the front-end with Angular: mood journal, self-assessment tests, chart dashboards and a resource library.
- Integrate the interface of Titou, an AI assistant available by text and voice, connected to the back-end via a REST API.
- Define the platform's visual identity and design system (colors, typography, components).
- Handle application state, API integration, testing and debugging.
- Lead the product as Product Owner.

Project Assistant | Electromechanical Engineering and Maintenance Company, Dakar
April 2023 – September 2023

- Monitored schedules and budgets, and wrote work progress reports.
- Prepared technical documents and presentations for meetings with clients and partners.

FRONT-END PROJECTS (SIMPLON SENEGAL)

AgriMétéo Sénégal – Climate monitoring application | *Front-End Developer*
Link: brief-agri-meteo-angular-typescript.vercel.app

- Developed an Angular 17 application (SPA) for climate monitoring covering Senegal's 14 regions.
- Created Angular services and components, and integrated dynamic charts with Chart.js.
- Worked in pairs using a branch-based Git workflow and wrote the technical documentation.

Sunu Signalement – Civic-tech incident reporting application | *Front-End Developer*
Link: civic-tech-incidents.netlify.app

- Developed an Angular 17 application with standalone components to report urban incidents in Dakar.
- Delivered the project with complete documentation and a task breakdown.

YEES NAA CONNECT – Short-supply-chain marketplace for the local rice sector | *Full-Stack Developer*

- Implemented the design system from Figma to code with TailwindCSS, for the admin and processor pages.
- Developed Angular components and planned the workflows of a team of 4.
- Containerized the application with Docker and deployed it to production on LWS hosting.

Sunu Idées – AI-powered idea management application | *Full-Stack Developer*

- Evolved the interface from vanilla JavaScript to Vite.js (ES modules), then to Angular.
- Connected a Supabase database, added AI idea categorization (OpenRouter) and deployed the application on Vercel.

Interactive quiz application | *Front-End Developer*

- Developed Angular quizzes consuming a Django REST API, with progressive difficulty levels, an overall score and mistake review.

JOJ Dakar 2026 – Spectator platform | *UI/UX Designer*

- Designed 10 user screens and 9 admin dashboard screens in Figma, based on a dedicated design system.

Eco-Stock – Inventory management application | *UI Design*

- Designed the interfaces of 8 pages and modals based on the documentation of an existing REST API.

EDUCATION AND CERTIFICATIONS

Professional Certification – Web, Mobile & AI Developer (DWWM + AI) | Simplon Senegal – African Tech Bridge, Dakar | *2026*

FORCE-N Program – Digital Entrepreneurship | Cheikh Hamidou Kane Digital University & Mastercard Foundation | *2023 – 2026*

Certificates earned through the program:

- Certificate in Artificial Intelligence (2026)
- Certificate in Front-End Development (2024)
- Certificate in Digital Marketing (2023)
- Certificate in Computing and Internet (2023)

Cybersecurity Certificate – Women in Cybersecurity Education (WiCE) | Cyber221 | *2024*

BTS (Higher National Diploma) in Industrial Computing and Networks | Senegal-Japan Vocational and Technical Training Centre, Dakar | *October 2023 – July 2025*

Bachelor's Degree, Year 2 – Mathematics, Physics and Computer Science | Alioune Diop University of Bambey | *2021 – 2022*

Bachelor's Degree, Year 1 – Mathematics, Physics, Chemistry and Computer Science | Alioune Diop University of Bambey | *2019 – 2021*

Baccalaureate, Series S2 (Experimental Sciences) | Groupe Scolaire Educazur | *2018*

LANGUAGES

French: fluent (C2) | **Wolof:** native (C2) | **English:** intermediate (B1)

PROFESSIONAL STRENGTHS

Creativity | Attention to detail | Product vision | Rigor | Adaptability | Team spirit
