## PROFESSIONAL SUMMARY

Full-Stack Web, Mobile and AI Developer certified by Simplon Senegal, with dual expertise in software development and technical project management. I master the complete lifecycle of a web and mobile application, from the Figma mockup to production deployment, covering the front-end, the back-end and AI integration. Founder of Sen Suivi la Solution, the company behind Sen Suivi, a mental well-being monitoring and prevention platform for Senegal featuring an AI assistant (LLM, RAG), which I lead from design to deployment. Scientific background in mathematics, physics, chemistry and computer science, plus a BTS in industrial computing and networks. I build digital solutions that are useful, accessible and scalable.

## SKILLS

- **Full-Stack Development:** design and build responsive web and mobile applications, from an Angular front-end to a Django and FastAPI back-end, with secure and documented REST APIs
- **Artificial Intelligence:** integrate AI into applications (chatbots, LLMs, RAG, computer vision) and automate processes with n8n
- **Databases:** model databases with the Merise method (conceptual and logical data models) and manage relational databases
- **Deployment:** containerize an application with Docker and put it into production
- **UI/UX Design:** create application mockups and prototypes in Figma, design a website's logo and visual identity
- **Software Design:** analyze user needs and model an application in UML (use case, class and sequence diagrams)
- **Agile Project Management:** lead projects with Scrum and Kanban, act as Scrum Master (sprints, backlog, ceremonies) and track progress
- **Collaboration & Quality:** work in teams with Git and GitHub, test and debug applications

## TECHNICAL KNOWLEDGE

- **Languages:** Python, JavaScript, HTML5, CSS3, PHP, SQL, C
- **Frameworks & Libraries:** Angular, TailwindCSS, Django, Django REST Framework, FastAPI, Flutter, Node.js, Vite.js, Chart.js
- **Databases:** PostgreSQL, MySQL, SQLite, Supabase
- **AI & Automation:** Hugging Face, OpenAI, OpenRouter, GroqCloud, n8n
- **DevOps & Deployment:** Docker, Git, GitHub, LWS, Vercel, Netlify
- **Design & Project Management:** Figma, Photoshop, Illustrator, Premiere Pro, Jira, Trello, ClickUp, Notion
- **Office Tools:** Excel, Word, PowerPoint, Access, Google Workspace, Matlab

## PROFESSIONAL EXPERIENCE

**Founder & Full-Stack Developer** | Sen Suivi la Solution, Dakar
*November 2023 – Present*

- Designed and built Sen Suivi, a web and mobile platform (PWA) for monitoring and preventing mental health issues in Senegal.
- Developed the back-end with Django and PostgreSQL, and the front-end with Angular.
- Integrated Titou, an AI assistant (text and voice) based on LLMs and a RAG architecture served by a FastAPI microservice.
- Built a mood journal, stress self-assessment tests, tracking dashboards and a space for connecting with professionals.
- Managed the project in Kanban (Trello, GitHub) and automated reminders and notifications with n8n.
- Conducted market research, a Business Model Canvas and field validation.

**Project Assistant** | Electromechanical Engineering and Maintenance Company, Dakar
*April 2023 – September 2023*

- Monitored project schedules and budgets, and wrote work progress reports.
- Prepared technical documents and reports for meetings with clients and partners.
- Took part in planning and organizing preventive and corrective maintenance operations.

## TECHNICAL PROJECTS (SIMPLON SENEGAL)

**Andë Sétal – Civic-tech platform for urban sanitation management** | *Back-End Lead*

- Designed the REST API (Django 5, DRF) for citizen incident reporting for the Dakar Plateau City Hall.
- Contributed to the architecture: Angular (PWA), TailwindCSS, MySQL, AI module (FastAPI, Hugging Face, RAG) and Docker.
- Organized team work with Git Flow and took part in QA testing.

**YEES NAA CONNECT – Short-supply-chain marketplace for the local rice sector** | *Full-Stack Developer*

- Planned workflows and distributed tasks within a team of 4.
- Developed the Django models and admin pages, with end-to-end product traceability via QR codes.
- Implemented the Figma design system in code with TailwindCSS.
- Containerized the application with Docker and deployed it to production on LWS hosting.

**Eco-Stock – Inventory management application** | *Back-End Developer*

- Designed a complete REST API with Django for catalog and inventory management.
- Documented the endpoints for front-end integration.

**KeurÉtudiant – Student housing platform** | *Scrum Master & Project Management*

- Scrum Master role: sprint planning, running Scrum ceremonies and managing the team backlog.
- Wrote the project scoping document based on Senegalese legal texts.
- Performed a PERT analysis and identified a 31-day critical path for a team of 5.

**AgriMétéo Sénégal – Climate monitoring application** | *Front-End Developer*
Link: brief-agri-meteo-angular-typescript.vercel.app

- Developed an Angular 17 application (SPA) with TailwindCSS for climate monitoring across Senegal's 14 regions.
- Integrated dynamic charts with Chart.js and worked in pairs using a branch-based Git workflow.

**Sunu Signalement – Civic-tech incident reporting application** | *Front-End Developer*
Link: civic-tech-incidents.netlify.app

- Developed an Angular 17 application with standalone components to report urban incidents in Dakar.

**Sunu Idées – AI-powered idea management application** | *Full-Stack Developer*

- Evolved the application from vanilla JavaScript to Vite.js, then to Angular.
- Connected Supabase, added AI idea categorization (OpenRouter) and deployed on Vercel.

**JOJ Dakar 2026 – Spectator platform** | *UI/UX Designer*

- Designed 10 user screens and 9 admin screens in Figma, based on a dedicated design system.

## EDUCATION AND CERTIFICATIONS

**Professional Certification – Web, Mobile & AI Developer (DWWM + AI)** | Simplon Senegal – African Tech Bridge, Dakar | *2026*

**FORCE-N Program – Digital Entrepreneurship** | Cheikh Hamidou Kane Digital University & Mastercard Foundation | *2023 – 2026*

Certificates earned through the program:

- Certificate in Artificial Intelligence (2026)
- Certificate in Front-End Development (2024)
- Certificate in Digital Marketing (2023)
- Certificate in Computing and Internet (2023)

**Cybersecurity Certificate – Women in Cybersecurity Education (WiCE)** | Cyber221 | *2024*

**BTS (Higher National Diploma) in Industrial Computing and Networks** | Senegal-Japan Vocational and Technical Training Centre, Dakar | *October 2023 – July 2025*

**Bachelor's Degree, Year 2 – Mathematics, Physics and Computer Science** | Alioune Diop University of Bambey | *2021 – 2022*

**Bachelor's Degree, Year 1 – Mathematics, Physics, Chemistry and Computer Science** | Alioune Diop University of Bambey | *2019 – 2021*

**Baccalaureate, Series S2 (Experimental Sciences)** | Groupe Scolaire Educazur | *2018*

## LANGUAGES

**French:** fluent (C2) | **Wolof:** native (C2) | **English:** intermediate (B1)

## STRENGTHS AND INTERESTS

**Strengths:** Entrepreneurial mindset | Product vision | Rigor | Adaptability | Team spirit | Perseverance
**Interests:** Taekwondo | Reading and writing | Tech and AI watch
