Binetou GUEYE

Back-End Developer – Python / Django | REST APIs & AI

Dakar, Senegal | +221 77 678 77 11 | binetouguey3s@gmail.com

LinkedIn | GitHub | Portfolio

PROFILE

Back-End Developer certified by Simplon Senegal (Web, Mobile and AI Developer), specialized in Python, Django and FastAPI. I design secure, tested REST APIs, model databases and continuously deploy containerized services to production. I integrate AI into microservices (LLMs, RAG, computer vision) and automate business processes.

SKILLS

- **Back-End Development:** design secure, documented REST APIs with Python, Django, Django REST Framework and FastAPI
- **Architecture:** split an application into microservices and model a system in UML
- **Databases:** model data with Merise and manage PostgreSQL (Neon), MySQL, SQLite and Supabase Storage
- **Artificial Intelligence:** integrate LLMs (Groq, Mistral) and RAG (ChromaDB, embeddings), classify intents and moderate content automatically
- **Computer Vision:** compare and deploy Hugging Face models (ResNet-50, ViT) behind an API
- **Automation:** automate reminders, notifications and indexing with n8n, GitHub Actions and cron-job.org
- **DevOps & Deployment:** containerize with Docker and Docker Compose, deploy on Render, Vercel and LWS, and configure Nginx and e-mail delivery (Brevo SMTP)
- **Quality:** test with Pytest, automate tests with GitHub Actions and debug applications
- **Collaboration & Methods:** work with Scrum (Scrum Master role), Git Flow and conventional commits
- **Soft skills:** rigor, adaptability, team spirit, autonomy, perseverance, curiosity

PROJECTS

Sen Suivi – Mental well-being monitoring platform *September – November 2026*

Full-Stack Developer

- Certification project: Django REST Framework API and PostgreSQL (Neon) database, containerized with Docker Compose.
- FastAPI microservice: three-level chatbot with distress detection and intent classification.
- RAG with ChromaDB and embeddings, LLMs via Groq and Mistral, and automatic forum moderation.
- n8n workflows, Pytest tests, GitHub Actions, Supabase storage, Brevo e-mails and deployment on Render.

Andë Sétal – Civic-tech platform for urban sanitation *August 2026*

Back-End Lead

- Set-up and structuring of the repository with Django 5, Django REST Framework and uv, on a MySQL database.
- Design of REST APIs consumed by an Angular PWA and by an AI module (FastAPI, Hugging Face, RAG).
- Git Flow repository organization within an architecture deployed with Docker, Nginx and GitHub Actions.

AI Quality Control – Computer vision image inspection *July 2026*

AI Developer

- FastAPI microservice that analyzes product images and returns a compliant or defective diagnosis.
- Comparison of two Hugging Face models (ViT and ResNet-50) and selection of ResNet-50, lighter on CPU.
- File validation (JPEG, PNG, WebP, 5 MB maximum) and a confidence threshold set at 0.70.

Eco-Stock – Stock management API *July 2026*

Back-End Developer

- Design of a complete Django REST API to manage catalogs, products and stock.
- Documentation of all endpoints to ease integration by the front-end team.

YEES NAA CONNECT – Marketplace for the local rice sector *June – July 2026*
Full-Stack Developer

- Design of a Django architecture with 5 apps and of the marketplace data models.
- End-to-end product traceability with QR codes, through a relation between products and source stocks.
- Containerization with Docker and production deployment on LWS, within a 4-person team.

Sunu Idées – AI-powered idea management application *May – June 2026*
Full-Stack Developer

- Supabase database integration and automatic AI categorization of ideas through the OpenRouter API.
- Server-side proxy on Vercel to protect the API key.

EDUCATION

Professional Certification – Web, Mobile and AI Developer (DWWM + AI) *October 2026*
Simplon Senegal, Dakar

Higher National Diploma (BTS) in Industrial Computing and Networks *October 2023 – July 2025*
Senegal-Japan Vocational and Technical Training Center (CFPT), Dakar

2nd-year Bachelor's in Mathematics, Physics and Computer Science *October 2021 – February 2023*
Alioune Diop University, Bambey

Scientific Baccalaureate (S2 series) *July 2018*
Groupe Scolaire Educazur

CERTIFICATIONS

Artificial Intelligence Certificate | FORCE-N Program (UN-CHK & Mastercard Foundation) *2026*
Front-End Development Certificate | FORCE-N Program *2024*
Cybersecurity Certificate – Women in Cybersecurity Education (WiCE) | Cyber221 *2024*
Digital Marketing Certificate | FORCE-N Program *2023*
Computer and Internet Skills Certificate | FORCE-N Program *2023*

INTERESTS

Writing | Tech watch and artificial intelligence
